Dear Col

Just a note to let you know how our Christmas NOTAM event went.

We had a three day event over the 30th, 31st December and 1st January. We had a total of twenty eight entries and we had four contests. The weather was fine and sunny with plenty of thermal activity.

It was good to see two enthusiastic juniors, Brett Achterdenbosh and Simon Boundy, flying so competently at this competition.

Peter Donovan as usual turned up with the unusual, a brace of models by Michael J Roll (1938 Ziac Year Book) the smallest with for 2cc 72 inch WS and the Texaco model being 128 inch WS, powered by Enya 46 4S (Enclosed is photograph). I have it on good authority Peter's next model is a "Pterodactyl".

Following is a list of contestants and scores - note the "huge" winning margin in the fly-off between myself and Warrick Bates.

P.S. NOTAM is folding! no more contests there, because of to much work for too few and too far away.

Enclosed are photographs including, Brett A, his Duration Lanzo-bomber and Dad, and Simon B with his 1/2 A Flamingo.
